Experience of 22 years...

Our company has been active for 22 years in engineering services sector since the year 1998 when it was established. It has been our principle and tradition to conclude all projects undertaken with the awareness of the importance of map engineering services which is the first step of all infrastructure works in the development of the country, right and on time by fulfilling the requirements of construction and application regulations and technical specifications meticulously.

The trust that has grown over time with the experience and customer satisfaction in the market has brought consultancy and advisory services along apart from main business area of engineering applications and measurements. Technical consultancy, coordination and advisory services were provided for the investments of powerful companies of our country in our region.

Our company took its first step into the construction industry in 2016 with its innovative perspective, quality principles, and sense of responsibility for the environment and human life. By using the most advanced technology in architectural design and technique, we create structures that focus on customer satisfaction and respond to the needs of the moment and the future with the principle of delivery on time. We will continue creating livable places for you...

OUR MISSION

We are working hard to surpass standards of the sector and investment circle. We make this by containing the best staff that can make reasonable investments and by supporting a culture that values integrity and success. We have shown that we have taken all necessary steps to strengthen our commitment to our understanding of integrity and business ethics, even in the most challenging economic periods.

IN SHORT TERM

Currently focusing on Turkey, our company which is highly respected and well-known provider of investment management services, plans to expand to Turkey, Middle East and the countries of the region.

IN LONG TERM

Being an enviable worldwide investment management services provider with a versatile customer portfolio and investments including Turkey, Middle East, North Africa, Eastern Europe and USA, being a worldwide respected real estate fund manager especially in Europe and Middle East markets.

Drawing of the Town Map

On the Town Map, triangulation, RS points, polygon points, buildings, the number of storey of the buildings, roads, pavements, streets, and off-road elevation curves, trees, electricity poles, block and parcel borders and numbers, etc. everything in the worked area is shown.

Dwelling Projects

In the right areas, we are building residences consisting of smart apartments with a livable and privileged architecture...

We Produce Solutions for Urban Transformation

More than 7 million buildings need to be renewed in order to purify our country from illegal structures and buildings that pose a disaster risk. As company, we offer you the fastest and most suitable solutions both on the basis of block (all existing buildings) and parcels (existing buildings).

These are done in Urban Transformation Respectively

- Learning the zoning status
- Performing some operations in the field of the project such as renunciation for road and amalgamation
- Evaluation of concept desing suitable for the project area.
- Receiving the opinions of the owners by giving presentation on the project
- Evaluation and proposal process of the project to be made with the construction companies
- Evaluation of the proposals received with the owners
- Signing contracts with the construction company for the proposal deemed appropriate
